

54th International Training Programme on **STANDARDIZATION AND CONFORMITY ASSESSMENT**

Dates : 20th November – 08th December 2023

Duration : 3 weeks

Programme Outline

The training comprises of the following phases:

Acclimatization, Study & Workshops : 2 weeks and 2 days

Industrial Visits : 3 Days

Aspects Covered

Various aspects of Standardization, Quality Assurance and Management Systems to be covered during the study phase include:

- Organization and Functions of National Standards Body (NSB)
- Standardization – Fundamentals, Development & Drafting of Standards, Responsibilities of Committee Secretaries, International Standardization scenario and WTO
- Certification - Principles and Practices, Product & System Certification
- Management Systems - Quality Management System, Environmental Management System, Occupational Health and Safety Management System, Food Safety Management System, Information Security Management System, Service Quality Management Systems, Energy Management Systems and Social Accountability Management Systems.
- Implementation and Promotion of Standards
- Computerization Activities of NSB

Besides the above, the participants will also be given an opportunity, to the extent possible, to:

- Attend meetings of BIS Technical Committees engaged in the formulation of national standards;
- Visit industrial establishments, test houses, etc. within the country for assessment of the impact of standardization, product certification and management system certification on trade and industry; and
- Organize mock committee meetings for the formulation of standards.
